

NOVUS HACKATHON · OCTOBER 2026

Unmet Asks

Ghost Requests v2

Every question your users ask your AI agent becomes **a fix, a roadmap vote,** or **a “you asked, we built it” moment** — and Novus proves it worked.

Built on Novus · Pendo Agent Analytics · Guides · Segments · Jira / Linear

Nobody

Unmet Asks

Our own signals flagged chat's unanswered asks in August (NOVUS-1949). It's still in Backlog.

One loop: from a question to proof it worked.

Pendo-only: hearing the ask, changing the in-app experience, and measuring the outcome all live in one platform.

Five kinds of ask. Each one has an action.

Unfindable The product does it; they couldn't find it. Fix with a guide	Unmet The product can't do it yet. Attach demand to a ticket	Agent miss The product does it; the agent got it wrong. Ask Novus why	Met The agent delivered. Counted for the baseline	Off-topic Not about the product. Kept out of demand
--	---	---	---	--

Judged against the customer's product catalog: wiki, pages, features, track events, product areas, agent tools.

Right on the agent dashboard they already use.

Unmet asks

What your users asked Billing Bot that it couldn't deliver, and what to do about each.

5

V1 → V2

From a staff report to a customer product.

	v1	v2 · Unmet Asks
Who sees it	Pendo staff	Customers, on the agent dashboard they already use
Whose agent	Novus's own chat	The customer's AI agent (Agent Analytics)
Who asked	Counted by account	Visitors counted, accounts named, askers targetable
What happens next	Nothing — it's a report	Guide · ticket demand · tell · prove

0

critical findings in 3 reviews

Pendo is the only platform that can **hear the ask**,
change the experience, and **prove it worked** —
in one loop.
